## NORTH OGDEN NOTES

Nepht J. Brown is erecting a white  
pressed brick residence on Washing-  
ton avenue and Mrs. Annie McGregor  
is building a new home on Main  
street.

A number of our citizens are moving  
to new homes elsewhere. Charles  
B. Farr and family to Metropolis, Ne-  
vada; Charles R. Ford and family to  
Rigby, Idaho, and Edmund and Geo.  
Hill and families to Lorenzo, Idaho.

A successful school year has just  
closed under the direction of Prin-  
cipal John Q. Blaylock, assisted by an  
energetic body of assistants. The  
following are graduates from the county  
school course: Bernice Grace Ran-  
dall, Robert Edmund Ellis, Ellen Elean  
Orton, Benjamin Norris, Mena Bertha  
Brown, William H. Berrett, Fawn Wil-  
son, Carl Storey, Martha Chatain, Lester  
Casteel, Elizabeth Casteel, Mable  
Hubard, Byron Arthur Chadwick, Sadie  
L. Jones, Reta May Randall, Victor  
Clyde Rogers, Floyd W. Campbell, Horace  
James Dugman. This is the  
largest class in the county and has  
the highest average per cent; Carl  
Stimpson Storey holding the distinction  
of having the highest average  
per cent of any pupil in the county.

On the evening of June 4 in the  
North Ogden amusement hall will be  
presented by the local dramatic asso-  
ciation the drama entitled "Nevada".  
The family of Bishop Frederick Bar-  
ker has just been released from a  
quarantine of nearly six weeks.

We have had the most widespread  
epidemic of contagion since the begin-  
ning of the year that has ever been  
known in the history of quarantine in  
the district. There were 267 cases  
in 119 families, divided between small-  
pox, chickenpox, scarlet fever, whoop-  
ing cough and mumps. No deaths  
have occurred.

Patriarch James Ward is spending  
a few days visiting with his sons Jo-  
seph and Cyrus Ward at Preston, Ida.

Sacred Concert, Alhambra,  
Sunday, 2:30 to 4:30.

## FRONTAL ATTACK IS DISASTROUS

By FREDERICK RENNET.  
Petrograd, May 28.—The Germans,  
since they have failed to deprive the  
Russians of control of the situation  
in Galicia, are so close to the differ-  
ent Russian armies that they are com-  
pelled to make frontal attacks, in  
which they suffer very heavy losses.  
Through inability to maneuver they  
were defeated at Stryl in attempting  
to reach the naphtha field, and many  
prisoners were taken.  
The Russians on both sides of the  
Vistula are moving slowly westward  
from the San, and are threatening the  
entire German flank.

## RUSSIANS TAKE SEVENTEEN GUNS AT ONE POINT

Petrograd, via London, May 28.  
11:45 p. m.—The following official  
communication was issued tonight:  
"In the Shavil region our troops  
have captured the strongly fortified  
position of Buble, taking more than a  
thousand German prisoners.  
"On the lower Dnubysa there has  
been a stubborn fighting.  
In Galicia, the fighting on the San  
continues with the same intensity.  
On the night of May 27 our troops  
opened an energetic offensive against  
the enemy positions north and east  
of Sleniawa, inflicting on the enemy  
heavy losses. In the course of the  
day we captured his fortifications on  
the Pigary front, where the Third Cau-  
casian corps captured 6000 Austrians  
and Germans and six heavy guns and  
six field guns.

"Nevertheless, on the south and east  
of Radymno the enemy, profiting by  
his considerable superiority in artill-  
ery fire, gained a certain amount of  
ground on both banks of the San.  
"East of Gousskov, near Klotkowice,  
the enemy, after furious fighting,  
which lasted several days, succeeded  
in capturing fresh trenches from two  
of our battalions.

"Between the great marshes of the  
Dniester and Dolina the enemy, who  
began a series of resolute attacks  
on May 25, was repulsed nearly ev-  
erywhere and could only maintain him-  
self in front of our wire entangle-  
ments, from which he is being gradu-  
ally dislodged by our counter at-  
tacks.

"According to the latest informa-  
tion, the Third Caucasian corps, re-  
suming the offensive on the night of  
the 27th, carried Sleniawa by assault,  
took an additional thousand prisoners  
and captured five guns.

## To Put On Flesh And Increase Weight

A Physician's Advice

Most thin people eat from four to  
six pounds of good solid fat-making  
food every day and still do not in-  
crease in weight one ounce, while on  
the other hand many of the plump,  
chunky folks eat very lightly and  
keep gaining all the time. It's all  
bosh to say that this is the nature of  
the individual. It isn't Nature's way  
at all.

This folks stay thin because their  
powers of assimilation are defective.  
They absorb just enough of the food  
they eat to maintain life and a sem-  
blance of health and strength. Stuf-  
fing won't help them. A dozen meals  
a day won't make them gain a single  
"stay there" pound. All the fat-pro-  
ducing elements of their food just  
stay in the intestines until they pass  
from the body as waste. What such  
people need is something that will  
prepare these fatty food elements so  
that their blood can absorb them and  
deposit them all about the body—  
something, too, that will multiply  
their red blood corpuscles and in-  
crease their blood's carrying power.

For such a condition I always re-  
commend eating a Sargol tablet with  
every meal. Sargol is not, as some  
believe, a patented drug, but is a sci-  
entific combination of six of the most  
effective and powerful flesh building  
elements known to chemistry. It is  
absolutely harmless, yet wonderfully  
effective and a single tablet eaten  
with each meal often has the effect  
of increasing the weight of a thin  
man or woman from three to five  
pounds a week. Sargol is sold by A.  
R. McIntyre and is being sold every-  
where on a positive guarantee of  
weight increase or money back. A.  
R. McIntyre Drug Co.—Advertisement.

## SHIP IS ON FIRE IN THE PACIFIC

San Francisco, May 28.—At mid-  
night no word had been received for  
hours regarding the freight steamer  
Mackinaw, which, late today, was re-  
ported to be on fire off Point Reyes,  
near San Francisco. A seventy-mile  
gale was blowing up mountainous seas  
and it was feared here that the ves-  
sel, probably without steam, was in  
grave peril. Her crew of forty con-  
sists almost entirely of Chinese cool-  
ies.

The Mackinaw recently was in the  
China trade. Shipping men here, dis-  
cussing the plight of the vessel, said  
that her captain, William C. Krebs,  
probably would have his difficulties  
increased by the Chinese. It was  
pointed out that Chinese sailors were  
inclined to become panic-stricken in  
great emergencies.

The steam schooner Coronado is  
known to have responded to the Mack-  
inaw's distress signals. The schooner  
Speedwell, which also answered the  
calls, was forced by the gale to put  
into Drake's bay for shelter.

The first signals from the Mack-  
inaw were picked up about 7:30  
o'clock. The radio calls were almost  
continuous up to 8, then they weak-  
ened and finally ceased. This was  
taken to indicate that the Mackinaw  
was without steam and that the op-  
erator resorted to his auxiliary batteries,  
which, in turn, failed.

Reserve your loges in ad-  
vance at the Alhambra for Sun-  
day afternoon, Decoration Day  
program.

## ITALIANS SINK A SUBMARINE

Rome, May 28.—It is officially an-  
nounced that an Austrian submarine  
boat was sunk by Italian torpedo boats  
in an engagement yesterday.  
A successful raid on the Trieste-  
Nauersla railroad by a squadron of  
Italian Hydro-aeroplanes, together  
with the occupation of additional Aus-  
trian territory along the Tyrol fron-  
ter and on the Friuli front, are re-  
ported in an official statement issued  
by the Italian war office. It is stated  
that an artillery battery was be-  
tween the Italian fortified positions  
on the Trentino front and those of  
the Austrians.

## Results of Sea Fighting.

Rome, May 28.—A communication  
issued today by the Italian ministry  
of marine gives the following details  
of naval losses by Austria and Italy  
up to the present.  
"On May 24, the Austrian torpedo  
boat S-20, having approached the  
canal at Porto Corsini, was so seri-  
ously damaged by the fire from our  
masked batteries that she was forced  
to be conveyed to Pola. The torpedo  
boat destroyer Scharfschutze, which  
was operating with the S-20, also was  
damaged, suffering the loss of many  
of her crew. She called the scout  
ship Navarra to her assistance, which  
was struck several times and also had  
several of her crew killed, includ-  
ing an officer. The destroyer Ozepele  
also suffered severe losses, due to  
the arrival of our squadron dur-  
ing the action.

"After the preceding brilliant ac-  
tion, we regret exceedingly to an-  
nounce the loss of our destroyer Tur-  
bine.  
"Nine men from the Turbine were  
saved by our fleet. From Austrian  
communications we learn that thirty-  
five more were picked up by the  
Austrians, including the commander.  
"Two of our torpedo boats yester-  
day engaged an Austrian torpedo boat  
and two submarines. One of the  
latter was hit several times, thick  
black smoke poured out of the sub-  
marine, a column of water shot up  
and she disappeared with a loud hum-  
ming sound, leaving patches of oil on  
the surface. Our torpedo boats were  
not damaged."

## SUBMARINES ARE SOURCE OF WORRY

Amsterdam, May 28.—A dispatch  
received here today from Berlin says  
that Captain Persius, the naval ex-  
pert, writing in the Berlin Tageblatt  
in praise of the exploit of a German  
submarine in sinking the British bat-  
tleship Triumph off the Dardanelles,  
says that this small undersea boat  
must have cruised upwards of 3400  
miles from the North sea around Gibr-  
altar to the Dardanelles, and all  
under her own power, without stop-  
ping at a supply station.

London, May 28.—The success of  
the German submarines in their at-  
tacks on the British fleet supporting  
the army on the Gallipoli peninsula,  
which has resulted in the sinking of  
the battleships Triumph and Majestic,  
with the ever-increasing activity of  
these boats in the waters around the  
British Isles and the threat to carry  
this underwater warfare to the Suez  
canal, while they have not caused  
any great uneasiness in naval circles  
here, have brought one official to a  
realization of the great danger that  
will exist if Germany is able largely  
to increase her fleet of "U" boats.

Today came reports of the sinking  
of the British steamers Carey and  
Spennymoor and the Swedish bark  
M. Roosvall, and a statement that the  
big liner Argylshire was chased and  
fired upon by a undersea boat, but  
succeeded in escaping and reaching  
Havre.

Will Face Janger.  
Trade to and from British ports  
goes on as if there were no subma-  
rine danger, and it is said that there  
will be no interruption in the opera-  
tions in the Dardanelles. The fleet  
there will have to assist the army on  
the Gallipoli peninsula, taking chan-  
ces of destruction by submarines and  
mines or shell fire.

The Turks and their German offi-  
cers probably will have another in-  
vasion to meet before long. Unoffi-  
cial reports reaching here today are  
that the Italians have landed on the  
Island of Rhodes, off the coast of Asia  
Minor, while a cruiser has been bom-  
barding Budrum, which is on the Gulf  
of Kos, on the mainland of Asiatic  
Turkey, not far from Rhodes. This  
is believed to be the first step in an  
attempt to land on the Asia Minor  
coast.

In the west the French offensive  
north of Arras is still in progress, but  
the advance by the allied troops seem-  
ingly is not so fast as it was when  
the attack was first launched. The  
British also are engaged north of La  
Bassee and are almost continuously  
occupied in resisting German attacks  
around Ypres, the attempt to capture  
which place is said to have cost the  
Teutons an enormous number of men.

## SINKING MANY BRITISH SHIPS

Falmouth, May 28.—The new British  
steamer Spennymoor has been sunk by  
a German submarine off Start point,  
Orkney Islands.

The captain and five men of the crew  
of the steamer were drowned by the  
capsizing of a boat while it was being  
launched, and the engineer was badly  
injured by the bursting of a shell in the  
engine room.

## AMERICAN CITIZENS IN CASUALTY LISTS

Ottawa, Ont., May 28.—The names  
of several men with American ad-  
dresses appearing in the casualty list of  
the Canadian contingent of the Brit-  
ish army made public here tonight.  
Edward Clinton Baddeley, Portland,  
Ore., and L. L. Spalding, Aitken,  
Minn., are among the wounded, and  
James Morris, Sault Ste. Marie, Mich.,  
is missing.

## SEVERE LOSSES FOR THE KAISER

Petrograd, May 28.—The situation  
in Galicia is one of permanent crisis  
at one point or another of the line.  
The fighting continues practically  
without cessation day and night.  
The main front still follows the  
course of the river San from its con-  
fluence with the Vistula as far as Prz-  
emysl and then, roughly, takes the  
direction of Sabor, Drohobycz, Stryl  
and Dolina. The Russians hold the  
ground on the left bank of the San at  
Przemysl and to the north of the  
town.

Apparently the tactics of the Ger-  
mans are to concentrate rapidly, first  
on one and then on another sector of  
the front, and by their usual reckless  
expenditure of blood and ammunition,  
try to effect a breach in the Russian  
position. Their immediate objective  
seems to be the highroad and railway  
connecting Przemyel with Lemberg,  
and the mass of their troops is as-  
sembled on the San south of Jaroslau,  
with the idea of reaching these by  
frontal attack.

For days now their efforts have met  
with no material success, and their  
casualties have been tremendous. Af-  
ter one of their assaults in the district  
of Gussakoff, southeast of Przemyel,  
the Russians counted more than 1000  
of the enemy's dead.

The army opinion here now is that  
the Russian's position in Galicia is as  
impenetrable as that they constructed  
west of Warsaw.

Enemy forces operating in the Bal-  
tic provinces also have been consid-  
erably augmented, and are said to  
amount to seven cavalry and six in-  
fantry divisions. The German com-  
mander is the well-known military  
critic, Vogel von Falkenhausen.

The Germans are in their greatest  
strength at Libau and around Shavil  
and Rossieny. Elsewhere in this re-  
gion they have only a thin line of  
troops.

The Russians are said to be fully  
prepared to meet the asphyxiating  
gases by means of which the Germans  
attempted to advance near Zedwabno.  
It is no secret that immediately the  
enemy had resorted to this expedient  
in the west, very prompt measures  
were taken to counteract it on this  
side.

## EXCURSION NORTH via OREGON SHORT LINE

May 22, June 5 and 19. Very low  
Round Trip rates to northern Utah  
and to Idaho points. Excursions also  
on other dates during July, August  
and September.

For rates and full particulars, call  
at City Ticket Office, Orpheum Block,  
or phone 2500.—Advertisement.

## AMERICANS ARE AFTER BUSINESS

Washington, May 28.—Another step  
toward the improvement of business  
and financial relations between the  
Americans was taken at the Pan-Ameri-  
can financial conference late today  
when delegates from the southern re-  
publics unanimously approved a resolu-  
tion calling upon the business and  
commercial interests of the United  
States to unite within the next six  
months in naming a delegation to visit  
all the South and Central American  
countries.

Members of the delegation, the resolu-  
tion provided, shall be the guests of  
the various nations and be received  
by the governments, by chambers of  
commerce and industrial organiza-  
tions. Diplomatic representatives of  
the southern republics accredited to  
the United States will be asked to aid  
in formulating arrangements for the  
trip. The plan was proposed by  
Minister Perry of Uruguay.

Adoption of the resolution and a re-  
port from the committee on uniform  
laws for all American nations marked  
today's general session. The commit-  
tee on uniform laws suggested a high  
commission of nine members from  
each country to consider uniformity  
in statutes relating to many subjects  
which locally concern business and  
commercial intercourse between the  
republics.

Representative Flood, chairman of  
the house committee on foreign af-  
fairs, and Secretary Garrison of the  
war department were two of the  
speakers of the day.

"I believe that the congress of the  
United States," said Mr. Flood, "will  
do for its power to carry out the  
results of the deliberations of this  
conference. The leadership of the  
future rests on the Americas. The  
world will be blessed with that lead-  
ership."

## New Chapter in History.

Mr. Garrison declared the confer-  
ence marked a new chapter in the  
history of the Americas. Other speak-  
ers were Roger W. Babson, J. Van  
Vechten Olcott, William Legendre and  
W. S. Kries of New York.

The Argentine delegation today vir-  
tually concluded consideration of re-  
commendations respecting arbitra-  
tion of commercial disputes between mer-  
chants of different nations. The re-  
port declared that prospect of a code  
for the settlement of such differences  
can be relied upon to advance devel-  
opment of trade relations and advo-  
cates uniformity of laws to bring  
about this end. In view of the fact  
that legislation would mean delay, the  
report suggests that steps be taken  
to have the business organizations in-  
terested establish such a system at  
once without waiting for legal support.  
It was announced that arrangements  
had been made for the appointment of  
a joint committee representing Argen-  
tina and the United States chamber  
of commerce to work out details of a  
code.

## HE BOUGHT A SAW.

Down in Alabama some time ago a  
man went into a store to buy a saw.  
He saw the kind he wanted and asked  
the price. It was \$1.65, the dealer  
said.

"Good gracious," said the man; "I  
can get the same thing from the mail  
order house for \$1.35."

"That's less than it costs me," said  
the dealer; "but I'll sell it to you on  
the same terms as the mail order house,  
just the same."

"All right," said the customer. "You  
can add it, along and charge it to my  
account."

"Not on your life," the dealer re-  
plied. "No charge accounts. You

## The Principle of Chiropractic for those who desire to know

For the benefit of those who are unfamiliar  
with the science of the Chiropractic and sim-  
ply know that it deals with the adjusting of  
vertebrae of the spine for the eliminating of  
disease from the body, this article is written.  
Volumes have been written by the developer  
of the science, B. J. Palmer, but the following  
should suffice to give an insight of the merits  
and principles upon which the great work is  
founded.

The word "Chiropractic" is derived from  
the Greek words which mean "done by hand."  
Chiropractic deals directly with the spine of  
man, and it has been firmly and thoroughly  
established—not theoretically, but positively  
proven a fact—that disease is caused by dis-  
placed vertebrae in the spine. Everyone knows  
that running down through the spine is the  
spinal cord, which connects with the brain.  
Branching off from the spinal cord, through  
the little windows under the vertebrae (the  
foramina), are the nerves which radiate to  
every portion of the body. It is the principle  
of the dynamo generating the current which  
is sent forth through the wires leading from it  
and distributed wherever the connection is  
complete. Man is mechanical, like the dynamo  
and its distributing plant. In the case of man  
the brain is the dynamo and the spinal cord  
is distributed through the body by way  
of the thousands of nerves which branch off,  
out and from the spinal cord.

Let the vertebrae become displaced and im-  
pinge these nerves, shutting off the life cur-  
rent, and wherever these nerves lead to, there  
is bound to be disorders. The Chiropractor  
adjusts these displaced vertebrae, permitting  
the life current to flow freely once more  
through the nerves and function is again es-  
tablished. The ordinary layman wonders, and  
always says: "It might be good for some-  
thing, but how are you going to relieve dis-  
orders in the legs and arms by punching the  
back?"

Any other information which might be desired by any one can be obtained by writing or visit-  
ing the office of Cullinan & Cullinan, Chiropractors, where a spinal analysis will be given to you  
free, and Chiropractic explained. Special attention given to ladies and children by Mrs. Louise  
Cullinan, D. C.

Cullinan & Cullinan, Chiropractors  
2370 Washington Avenue  
OGDEN, UTAH.

able port of Avlona.

"We left Rome in no doubt that an  
Italian attack on the Austro-Hungar-  
ian troops would also attack the Ger-  
man troops. The Italian manifesto of  
war, which conceals an uneasy consci-  
ence behind veiled phrases, does not  
give any explanation of why offers  
were refused. They were too shy  
perhaps, to say openly what was  
spread abroad as the pretext, that the  
Austrian note came too late and  
could not be trusted. Italian states-  
men have no right to measure the  
trustworthiness of other nations in  
the same proportion as they measured  
their own loyalty to a treaty."

DAVID JENSON,  
P. O. Address: No. 515 David Eccles  
Bldg., Ogden, Utah.  
First publication April 24, 1915.  
Last publication May 29, 1915.

## EXPOSITION SPORT PROGRAM COMMITTEE

San Francisco, Cal., May 28.—A  
committee of three amateurs, well  
known in American athletics, assumed  
charge today of the program of the  
Panama-Pacific exposition sports—the  
most ambitious list ever prepared for  
an exposition.

This management followed dissen-  
sions between other committees and  
the exposition management; the re-  
port of a \$42,000 deficit from polo  
and golf, and complaints of ineffi-  
ciency.

## ACCIDENT ON THE OREM ELECTRIC

Provo, May 28.—A head-on collision four  
miles north of Provo on the Orem road  
late this afternoon resulted in the prob-  
able fatal injury to three others.

John Gammon, 34, E. Barton of  
Provo, Curtis Green of Pleasant Grove  
and Thomas McCarty of Salt Lake were  
on a northbound switch engine running  
on the electric line tracks. Four miles  
from this city and immediately south of  
a cut around a sharp curve at that point  
the switch engine was struck by an elec-  
tric-driven gravel train, southbound.

Neither had any warning of the presence  
of the other. The front truck of the  
switch engine and gravel train left the  
rails.

When the crash came the boiler of the  
switch engine exploded, throwing the  
boiling water over the four men. Gam-  
mon is probably fatally burned. The  
other three sustained serious injuries.  
Barton and McCarty being hurt more  
than Green. C. G. Crawford conductor  
of the gravel train, was injured. The  
injured men were rushed to this city  
and taken to the Provo general hospital.

Gammon is 32 years of age and is the  
son of William H. Gammon of this city.  
A divorced wife and his child also live  
here. Barton, who is 41 years of age,  
is also a resident of Provo. He has a  
wife and four children. Green is a na-  
tive of Pleasant Grove and has a wife  
and family. McCarty lives at 657 South  
State street, Salt Lake.

## BAD FAITH SHOWN BY THE ITALIANS

Berlin, via London, May 28, 9:05  
p. m.—Dr. von Bethmann Hollweg, the  
German imperial chancellor, in a  
speech in the reichstag today, touched  
on Italy's entrance into the war.

"Italy," said the chancellor, "has  
now inscribed in the book of the  
world's history, in letters of blood  
which will never fade, her violation of  
faith. Nobody threatened Italy—nei-  
ther Austria-Hungary nor Germany.  
Whether the triple entente was con-  
tent with blandishments alone history  
will show later.

"Without a drop of blood flowing or  
the life of a single Italian being en-  
dangered, Italy could have secured the  
long list of concessions which I re-  
cently read to the house of territory in  
Tyrol and on the Isonzo, as far as  
Italian speech is heard; satisfaction  
of her national aspirations in Trieste,  
a free hand in Albania, and the valu-

## The Principle of Chiropractic for those who desire to know

It is natural that these questions should be  
asked, natural that people should entertain  
these thoughts, in view of the fact for cen-  
turies and centuries there was no other meth-  
od of attacking disease than going after the  
effect. Strange that prior to the coming of  
Mr. Palmer no one ever thought of going  
after the cause of disease.

That is what the Chiropractor does; he ad-  
justs the cause of the disease and lets nature  
make the cure. It makes no difference what  
part of the human organism is affected, lack  
of nerve function is causing the condition, and  
the lack of proper nerve nourishment is  
brought about by an impinged condition of  
the vertebrae at one or another of the several ver-  
tebrae. No "dope" is going to put new nerve  
into those nerves; it may deaden pain tempo-  
rarily, causing a relieved condition for a time,  
but just so long as the pressure exists on the  
nerves radiating from the spine, just so long  
will there be trouble. Take a hose and turn  
on the water and the flow is all right until you  
put a pressure on it, and then the slacks up or  
stops altogether, according to the pressure. So  
it is with the nerves.

For a long time Chiropractic, as is every  
new thought, was looked upon with skepticism,  
doubt and as a humbug. Today, those who  
investigate find that it is the only real science  
of healing giving direct and positive results.

Statistics at the Palmer School of Chiropractic,  
Davenport, Iowa, show that results are about  
ninety per cent of cases at the school, and  
there are over 700 adjusted daily in the open  
clinics and privately by the faculty members.  
And what is more, practically all of the cases  
at the school are chronic cases of people who  
found they could not get well from other  
methods and came to the school as a last re-  
sort.

Any other information which might be desired by any one can be obtained by writing or visit-  
ing the office of Cullinan & Cullinan, Chiropractors, where a spinal analysis will be given to you  
free, and Chiropractic explained. Special attention given to ladies and children by Mrs. Louise  
Cullinan, D. C.
